This is a detailed architectural floor plan of a traditional Chinese temple complex, likely the Guangji Temple (Guangji Temple) in Beijing. The plan is oriented with North at the top. It features a central longitudinal axis with multiple halls and courtyards. Key structures include the 'Zhongyuan' (Central Hall) at the top, followed by several smaller halls and a large 'Tianqian' (Heaven and Earth) hall. The plan is surrounded by a wall with gates on the left and right sides. The drawing is a black and white line drawing with some color highlights in red and yellow.
